

Line of semi-flexible ducts and accessories for use in single-family homes or shared housing. Specifically for use in drop ceilings with very limited space.

Easy to install like a flexible duct and as sturdy as a rigid duct, so it doesn't lose shape.
The internal design minimises pressure loss.
Available in circular or oblong.

Oblong:

Very low profile (50 mm) for use in very tight spaces.
Dimensions 114x50 mm.

Circular:

With low pressure loss so it can be installed inside suspension grid.
Dimensions 75 mm. ext / 63 mm int.

Full line of accessories.

Characteristics

- Polypropylene (PP) duct
- High-impact polystyrene accessories
- Easy to install
- Snap assembly
- Airflow regulation accessory
